All Construction Permits Require on-site inspections upon notification from permit holder or his/her agent. All structural criteria and plumbing and electrical criteria inspections shall be performed before **Certificate of Occupancy** can be issued. **Twenty-four hour** notice is required prior to all inspections.

Structural Criteria

Setbacks, Footings & Foundations
Framing & Structure
Final Inspection

Plumbing and Electrical Criteria

Rough plumbing and electrical before concealment.
Above ground plumbing & electrical before concealment.

Note to Contractors: An architect or engineers stamp is required for all three family dwellings and above. Also this is a requirement for commercial buildings or structures. All buildings over 10,000 require a seismic certification in accordance with State of Missouri Statutes.

A building contractor may design and build a one or two family dwelling house, flat, or apartment containing not more than two families per Section 327.101(b) of the current Revised State Statute
