COVID-19 Vaccination Screening and Consent under Emergency Use Authorization

Please complete the following information for the person receiving the COVID-19 vaccine.

PATIENT DEMOGRAPHIC INFORMATION

*Last Name:		*First Name:		Middle Initial:	
*Date of Birth		*Sex: Male <input type="checkbox"/> Female <input type="checkbox"/> Transgender <input type="checkbox"/> Other <input type="checkbox"/>			
*Race White <input type="checkbox"/> Black <input type="checkbox"/> Asian <input type="checkbox"/> Pacific Islander <input type="checkbox"/>			Hispanic Ethnicity: Yes <input type="checkbox"/> No <input type="checkbox"/>		
American Indian/Alaskan Native <input type="checkbox"/> None Specified <input type="checkbox"/> Refused <input type="checkbox"/>			Unknown <input type="checkbox"/> Refused <input type="checkbox"/>		
Address:				City:	
State:	Zip:	County:	Home Phone:	Cell Phone:	
Email:		<input type="checkbox"/> Private/Employer insurance	<input type="checkbox"/> Underinsured	<input type="checkbox"/> Uninsured	<input type="checkbox"/> Medicare <input type="checkbox"/> Medicaid

Phase 1A - Patient-Facing Health Care Workers and Long-Term Care Facility Residents and Staff Vaccinating those most vulnerable and those protecting them

- Hospitals, Long-term care facilities and residents, including Department of Mental Health
- Home health, Hospice, Dialysis centers, Urgent care
- Vaccinator staff and those administering COVID testing
- Congregate community healthcare settings staff and residents, including DMH contracted settings and adult day cares
- EMS and high-risk non-congregate healthcare, including clinics, physicians, and home care providers
- All remaining patient-facing healthcare providers, including but not limited to health care workers in emergency shelters, dental offices, school nurses, pharmacies, public health clinics, mental/behavioral health providers, and correctional settings

Phase 1B - Tier 1 Worker Information: Protecting those who keep us safe and help during emergencies

- First Responders Non-Patient Facing Public Health Infrastructure
- Emergency Management and Public Works Emergency Services Sector

Phase 1B - Tier 2 High-Risk Individuals: Protecting those who are at increased risk for severe illness

- Anyone aged 65 and older
- Any Adult with the following conditions:
Cancer, Chronic Kidney Disease, COPD (chronic obstructive pulmonary disease), Intellectual and/or developmental disabilities such as Down syndrome, Heart Conditions (such as heart failure, coronary artery disease, or cardiomyopathies), Immunocompromised state from solid organ transplant, Severe Obesity (BMI greater than 40), Pregnancy, Sickle Cell Disease, &/or Type 2 Diabetes Mellitus

Phase 1B - Tier 3 Critical Infrastructure: Protecting those who keep the essential functions of society running

- Education (K-12) Childcare Communications Sector Dams Sector Energy Sector
- Information Technology Sector Nuclear Reactors, Materials, and Waste Sector
- Transportation Systems Sector Water and Wastewater Systems Sector
- Government: Certain elected/appointed officials or other personnel designated by the executive, legislative, and judicial branches of state government
- Food/Agriculture Sector – initial: Employees of certain [food production and processing facilities](#), and related operations, prioritizing mass food production, distribution, transportation, wholesale, veterinary services, and retail sales.

Phase 2, Equity & Economic Recovery: Protecting those who have been disproportionately affected and accelerating economic recovery

- Chemical Sector Commercial Facilities Sector Critical Manufacturing Sector Defense Industrial Base Sector
- Financial Services Sector Higher Education Disproportionately Affected Homeless
- Government: Other state and local government designated personnel required to provide essential services
- Food/Agriculture Sector II: Remaining populations within the sector not included in 1B, including restaurants

Phase 3, Remaining Unvaccinated Populations: Protecting everyone else who has not been vaccinated, but wants to do so

- Resident who doesn't fall into the above phases/tiers

The State of Missouri is conducting a phased roll-out of the COVID-19 vaccine prioritizing saving lives and is dictated by vaccine availability. This form will gather information about you, including your employment and health risks to determine your eligibility and properly schedule your vaccination appointment. All your information will be kept confidential to the extent allowed by law. **By signing below you are self-certifying that everything you have indicated on this form is true and that you fall into the phase/tier indicated above.**

Specific information about the populations within each phase/tiers can be found on the [MOPStopsCovid.com](https://moplastops.com) website.

10.	Have you received a dose of COVID-19 vaccine in the past year? If so, date received:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The Public Readiness and Emergency Preparedness Act (PREP Act) authorizes the CICIP to provide benefits to certain individuals or estates of individuals who sustain a covered serious physical injury as the direct result of the administration or use of the covered countermeasures. The CICIP can also provide benefits to certain survivors of individuals who die as a direct result of the administration or use of covered countermeasures identified in a PREP Act declaration. The PREP Act declaration for medical countermeasures against COVID-19 states that the covered countermeasures are any antiviral medication, any other drug, any biologic, any diagnostic, any other device, or any vaccine used to treat, diagnose, cure, prevent, or mitigate COVID-19, the transmission of SARS-CoV-2 or a virus mutating from SARS-CoV-2, or any device used in the administration of and all components and constituent materials of any such product. Information about the CICIP and filing a claim is available by calling 1-855-266-2427 or visiting <https://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/pfizer-biontech-covid-19-vaccine> or <https://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/moderna-covid-19-vaccine>

ACKNOWLEDGMENT OF RECEIPT OF NOTICE OF PRIVACY PRACTICES

I, _____ have reviewed all demographic and insurance information and verify it is true and accurate to the best of my knowledge. I give
Print NAME HERE

my consent to the Cole County Health Department (CCHD) and its staff to provide medical services to include, but not limited to examination, treatment and care offered to me, and to the release of any medical information necessary to process this claim for health care payment. I hereby assign and transfer to CCHD, all benefits and payments now due and payable or to become due and payable to me under any insurance policy(s), under any replacement policies thereof, under any self-insurance program, or under any other benefit plan. I permit a copy of this authorization to be used in place of the original, and request payment of medical insurance benefits either to the party who accepts assignment or myself.

And

I acknowledge that I have been provided the opportunity to read the Cole County Health Department (CCHD) Notice of Privacy Practices (Notices):

- The Notice explains how CCHD will use my Protected Health Information (PHI) for the purpose of my treatment, payment for my treatment, and CCHD's health care operations
- I am aware that I may request a copy of the Notice at any time and CCHD will provide me with the most up to date copy of the Notice
- The Notice explains in more detail how CCHD may use and share my PHI for other than treatment, payment, and health care operations
- The Notice explains CCHD may also use and share my PHI as required/permitted by law/regulation
- The Notice explains prior authorization is required for release of psychotherapy notes, marketing, or the sale of PHI

COVID-19 Vaccination Screening and Consent under Emergency Use Authorization

Information for healthcare Professionals about the health history for COVID-19 vaccines

Are you feeling sick today? There is no evidence that acute illness reduces vaccine efficacy or increases vaccine adverse events. However, as a precaution with moderate or severe acute illness, all vaccines should be delayed until the illness has improved. Mild illnesses (e.g., upper respiratory infections, diarrhea) are NOT contraindications to vaccination. Do not withhold vaccination if a person is taking antibiotics. Vaccination of persons with current SARS-CoV-2 infection should be deferred until the person has recovered from acute illness and they can discontinue isolation. While there is no minimum interval between infection and vaccination, current evidence suggests reinfection is uncommon in the 90 days after initial infection. Persons with documented acute SARSCoV-2 infection in the preceding 90 days may delay vaccination until near the end of this period, if desired.

Have you ever had a severe allergic reaction (e.g., anaphylaxis) to something? For example, a reaction for which you were treated with epinephrine or EpiPen®, or for which you had to go to the hospital? Allergic reactions, including severe allergic reactions, NOT related to vaccines or injectable therapies (e.g., food, pet, venom, environmental, or latex allergies; oral medications) are NOT a contraindication or precaution to vaccination with currently authorized COVID-19 vaccine. HOWEVER, individuals who have had severe allergic reactions to something, regardless of cause, should be observed for 30 minutes after vaccination. All other persons should be observed for 15 minutes.

Have you ever had a serious reaction after any vaccination or injectable medication including a previous dose of the COVID-19 vaccine? History of severe allergic reaction (e.g., anaphylaxis) to a previous dose or component of the COVID-19 vaccine product being offered is a contraindication to that COVID-19 vaccine. If the patient answers Yes to this question, defer vaccination for 90 days from date of therapy.

In the past 14 days have you had contact with a confirmed COVID-19 patient? Wait until 14 days after quarantine period ends if the contact was in an outpatient or community setting. If person is a resident in a congregate healthcare or other congregate setting go ahead and vaccinate

Are you breastfeeding or pregnant? Is not a contraindication to current COVID-19 vaccination. While there are currently no available data on the safety of COVID-19 vaccines in pregnant people, studies and results are expected soon. Pregnant people may choose to get vaccinated. Observational data demonstrate that while the absolute risk is low, pregnant people with COVID-19 have an increased risk of severe illness. Breastfeeding is not a contraindication to current COVID-19 vaccine. Lactating people may choose to be vaccinated. There is no data available for lactating people on the effects of mRNA vaccines.

Have you received passive antibody therapy as a treatment for COVID-19? Based on the estimated half-life of monoclonal antibodies or convalescent plasma as part of COVID-19 treatment, as well as evidence suggesting that reinfection is uncommon in the 90 days after initial infection, vaccination should be deferred for at least 90 days, as a precautionary measure until additional information becomes available, to avoid interference of the antibody treatment with vaccine-induced immune responses

Are you immunocompromised? (taking medication or being treated for cancer, leukemia, HIV/AIDS or other immune system problems or taking medication that affects your immune system) is not a contraindication to current COVID-19 vaccine, including those with cancer, leukemia, HIV/AIDS and other immune system problems or taking medication that affects their immune systems. However, patients should be informed that the vaccine might be less effective than in someone who is immunocompetent.

Do you have a bleeding disorder or are you taking a blood thinner? COVID-19 vaccine may be given to these patients, if a physician familiar with the patient's bleeding risk determines that the vaccine can be administered intramuscularly with reasonable safety. ACIP recommends the following technique for intramuscular vaccination in patients with bleeding disorders or taking blood thinners: a fine-gauge needle (23-gauge or smaller caliber) should be used for the vaccination, followed by firm pressure on the site, without rubbing, for at least 2 minutes.
